**RESPONSE TO NOTICE OF DEFECTIVE APPEAL BRIEF  
AND PETITION TO ENTER AMENDMENT**

Sir:

Responsive to the Advisory Action mailed December 4, 1998, and further in response to the Notice of Defective Appeal Brief and Advisory Action mailed October 20, 1998, in the above-identified patent application, applicants hereby petition for entry and consideration of the Amendment mailed September 8, 1998.

RECEIVED  
99 JAN -1 PM 3:15  
BOARD OF APPEALS  
AMERICAN PATENT OFFICES

In response to the Notice of Defective Appeal Brief, please note that the Appeal Brief does contain the claims as pending prior to entry of the Amendment, in Appendix I, and the arguments have been based on the claims as finally rejected, not as proposed to be amendment. The Appeal Brief therefore should not have been rejected as defective.

The Amendment mailed with the Appeal Brief should have been entered. As noted in the Advisory Action, the examiner has no objection to the amendments to claims 1, 27 and 32. The

AND PETITION TO ENTER AMENDMENT

amendments to claims 8, 9, 10 and 23-25 were refused on the basis that they raised new issues. These amendments do not raise new issues, however, because they substantially narrow the scope of the claims on appeal, as well as make them more definite. These amendments therefore would narrow issues on appeal. The amendments are to change the language regarding the amino acid sequence to make it more definite; not to alter the scope. As originally presented, the claims recited a specific amino acid sequence "or structurally similar amino acids selected from the group consisting of (I,L,V), (F/V), (K/R), (Q/N), (D/E), and (G/A)". As proposed to be amended, the claims recite a specific amino acid sequence "or those amino acid sequences where I is replaced with either L or V, L is replaced with either I or V, V is replaced with I, L, or F, F is replaced with V, K is replaced with R, R is replaced with K, Q is replaced with N, N is replaced with Q, D is replaced with E, E is replaced with D, G is replaced with A, or A is replaced with G". See the specification as originally filed at page 15, lines 17-22.

In response to the Examiner's query regarding whether all amino acids are replaced, please note the use of the term "or". With regard to claims 10 and 25, these claims are still pending, and therefore properly included in the appendix.

In response to the statement in the Advisory Action mailed December 4, 1998, "brief does not address rejection under 112§2", which was not included in the please note that the Amendment was presented in response to this rejection. Enclosed in response to the Advisory Action is a revised Appeal Brief that does present argument as to this issue.
